## Abstract

Winter Tourism industry has been identified as one of the most vulnerable industries to climate change due to the expected changes on snow availability and temperature increases. The presentation aims to explain different cases in the Pyrenees and specially in Andorra Ski and Mountain resorts where the approach of Open Innovation Living Lab's has been implemented to collaboratively the industry, the public administrations and researchers, better understand climate vulnerability and jointly, co-create, prototype, implement and test innovative solutions that can help to be more resilient and sustainable to present and future climate change. The presentation will present the framework used and some cases of success that has ended to innovative projects or technological solutions that the mountain resorts are implementing to be more climate resilient.
